Since 2005, Black Creek has managed global equities in a disciplined and consistent manner. We are a focused, boutique investment manager and are 100% employee-owned. We invest personally in the strategies we manage, ensuring our interests are aligned with those of our clients.

Black Creek's investment-driven approach concentrates on building high conviction portfolios of winning businesses from around the world that are misunderstood or misperceived by the market. Our business-owner mindset and long-term perspective allow us to think differently. The net result for investors is not only a long-term, high-conviction strategy, but it means our portfolios are eclectic, bearing little resemblance to any global index. Any sector or geographical allocations within our portfolio are a by-product of our unconstrained, go anywhere global style. While our portfolios are concentrated, there is a conscious diversification of investment ideas.

We focus on understanding the long-term drivers of a winning business, not quarter to quarter earnings. Our investment process requires independent and sometimes contrarian thinking. We consider what a business will look like over the next 5 to 10 years, and short-term market volatility provides the opportunity to create significant value for our clients over time. This approach requires a constitution of character amongst our investment professionals to withstand the inevitable shorter periods of time when you look completely different from other investors in order to add long-term value.

Renaissance Asset Management (Renaissance) is a boutique investment manager that was established in 2003 and it specialises in the management of Australian smaller companies portfolios and listed property securities portfolios.

In smaller companies, Renaissance employs an active, bottom up investment style, focusing on building a portfolio of quality smaller companies that are trading on a discount to their assessed valuations. The manager will rotate between different securities based on its assessment of valuation and the risk and return profile of the companies. The portfolio typically holds between 40 and 100 companies.

In listed property securities, Renaissance employs an active, value style, and focuses on bottom-up stock selection. Mispriced securities are identified by the manager using its own research and propriety value ranking system. Stock-specific and portfolio risk controls are then overlaid to determine portfolio weights.

Resolution Capital Limited (Resolution Capital) is a specialist global real assets securities manager with a successful long-term investment track record and strong culture of fiduciary responsibility. The Firm was established in 2004 and is headquartered in Sydney and maintains an office in New York. Resolution Capital believes that listed real estate is an excellent means of gaining exposure to the underlying returns of some of the world's highest quality real estate assets in a simple, transparent, liquid and tax efficient form.

Resolution Capital is a value orientated investment manager with the objective of delivering superior risk adjusted long term returns, compared with recognised industry benchmarks. This is achieved through investment in a concentrated portfolio of carefully selected listed real estate securities with an emphasis on avoiding fundamental flaws which could reasonably result in permanent impairment of the underlying investments. This aligns Resolution Capital's investment process and security selection with clients' objectives of long-term real wealth creation and avoids the culture of index hugging.

Selector Funds Management Limited (SFML) is a Sydney based fund manager established in 2003. SFML's team combines deep experience in financial markets with diversity of background and thought. SFML believe in long-term wealth creation and building lasting relationships with their investors. SFML is a profitable investment firm, who maintains a strong balance sheet and carries no debt.

SFML has an 18-year track record of outperformance, and continues to seek businesses with leadership qualities, run by competent management teams, underpinned by strong balance sheets and with a focus on capital management.

SFML focus on stock selection, the funds are high conviction, concentrated and index unaware. SFML portfolios aim to have low turnover and to produce tax effective returns.

SFML's philosophy is to invest sensibly for the long term. A bottom-up stock selection process is used to identify good businesses selling at a fair price. As a good business evolves into a great business, its underlying real earnings per share grows. SFML aims to capture as much of this earnings growth as possible over time, since this can translate into share price appreciation.

All research is undertaken in-house, extensive analysis includes management interviews, modelling of each company and industry channel checks.

SFML believe Culture and ESG are intertwined. SFML consider them both integral to their assessment of a business. Voting is the other half of ESG, all resolutions are documented, researched, and voted inhouse. SFML's ongoing focus on culture and financial sustainability lends itself to strong ESG outcomes. This is evidenced by portfolio emissions significantly lower than index emissions, coupled with outperformance since inception.

SFML's portfolios are made up of their best ideas rather than slight variations to an index. SFML believe that simply hugging an index limits the returns to investors over the long run.

There are typically 100+ global companies that meet the fundamental characteristics that we require of all portfolio holdings (pricing power, recurring revenues, global opportunity, management strength, and financial strength) and that have successfully passed our rigorous fundamental research process to be included on what we call the Qualified Company List. From that list we then build portfolios of 25-35 companies, choosing those where we have the highest conviction in the underlying business fundamentals and that offer the most attractive opportunities based on our cash flow based valuation discipline.
