MARKET COMMENTARY

March saw both government & credit securities rally as global economic data continues to surprise on the upside, raising hopes that a soft economic landing is still on the horizon. Despite nominal growth surprising to the upside, the US Federal Reserve left rates unchanged in March but, importantly, the “dot plots” of expected future rates continued to indicate three cuts before the year’s end.

Domestic credit spreads participated in the global rally and tightened in March, as the short end outperformed. Corporate spreads kept pace with Financials, while Utilities also performed strongly. March saw Moody’s upgrade of the Australian banks following their Advanced Loss Given Failure analysis and coinciding methodology change. Offshore spreads continued their strong performance with Australian domiciled, Euro denominated credit performing notably well.

Domestic bond yields rallied in March ahead of most global bond markets. Australian 10-year Government bond yields rallied 17bps breaking the 4% mark settling at 3.97% to end the month. US 10-Year Treasury yields meanwhile rallied 4bps to 4.20%. Domestically, semi-government bonds underperformed Commonwealth government bonds.

Primary markets were active during March. The Tier 2 market saw a high-volume month boosted by a \$1.5bn AUD 10NC5 deal from HSBC that generated a \$5.8bn orderbook, one of the largest subordinated debt orderbooks in the Australian market’s history. We also saw new deals from Infrastructure names (such as Transurban), Telecommunications (such as National Broadband Network) and Utilities issuers (Ausgrid).

PORTFOLIO COMMENTARY

Tightening credit spreads were the key contributing factor to outperformance during the month. Domestic spreads consolidated their recent rally across financials, corporates and securitised sectors. The Fund’s allocation to domestic banks and RMBS were the key contributors to credit spread return over the month.

The Portfolio continues to collect running income above benchmark, contributing to outperformance. The Fund’s allocation to securitised sectors, and domestic major bank paper remain the key contributors to income return. The portfolio running yield at month end was 5.2%, with the average credit spread measured at 1.2%.

Sector allocations were actively adjusted during the month. The Fund’s allocation to domestic and offshore banks was trimmed. Non-financial corporate exposures were also reduced through both liquidation of a small number of corporate bonds and the addition of a short position in the iTraxx Australia CDS index. Lastly, allocation to securitised sectors was increased across RMBS and ABS.

The outlook for credit has improved, however the Fund remains defensively positioned, retaining the capacity to take advantage of relative value opportunities as the outlook continues to strengthen.

OUTLOOK

The credit outlook improved from neutral to positive in the first week of April following upgrades to some of our indicators.

Valuation indicators were upgraded to neutral coming into April. US High Yield spreads widened relative to recent levels, improving the valuation outlook. Meanwhile, Australian & US investment grade indicators remain neutral.

Robust economic growth prints turned our macro-outlook marginally positive. Manufacturing PMIs are showing signs of improvement in the US, UK & China with all 3 PMIs now in expansionary territory, while leading growth indicators in the US also improved.

Meanwhile, we saw no change to our market supply and demand indicators. High issuance volumes over recent months were met with robust market demand reflected in oversubscribed primary market deals and robust secondary market liquidity. However, while demand appears strong, the market is beginning to become a bit saturated with investors increasingly funding primary market purchases out of secondary market sales.

Technical indicators remained positive in March with US credit and equity both positive, however, our equity volatility signal flipped from neutral to negative. Intermediary positioning appears balanced with brokers showing modest inventories.

This publication has been prepared by Perpetual Investment Management Limited (PIML) ABN 18 000 866 535, AFSL No 234426.
