

Pension refresh facility

Please read the following information regarding the pension refresh facility before you complete this form.

The pension refresh facility provides an easy way for you to consolidate your existing Pension Plan account balance with any additional accrued superannuation benefits at any time after you have commenced your pension. This may be particularly useful, for example, if you continue working and receiving superannuation contributions after you have commenced receiving a pension, as it does away with the need for multiple pension accounts if you also want to take those additional superannuation benefits as a pension.

The pension refresh facility works as follows:

- your existing Pension Plan account balance is rolled into a new or existing Select Super Plan account (for the same amount(s) in the corresponding Investment Option(s) unless you request otherwise) and combined with any additional superannuation benefits that you've accrued in or transferred into your Select Super Plan account
- some or all of your then combined Select Super Plan account balance is transferred back into a new Pension Plan account to commence a new pension
- unless you advise otherwise, the same details that applied to your previous Pension Plan account will apply to your new Pension Plan account, including:
 - pension amount (unless a new minimum payment amount is required under the law)
 - pension payment instructions (eg payment frequency, payment date, drawdown order, bank account and any beneficiary (including reversionary) nomination)
 - any optional features (eg auto-rebalancing).

You should seek financial advice before using the pension refresh facility as there are likely to be associated financial, taxation and social security implications from moving your benefits between superannuation and pension arrangements.

To be eligible for this service, you must:

- hold both a Select Super and Select Pension (account based pension) account
- maintain a minimum balance of \$1,500 in your super account if you wish to keep this account open after your new pension is commenced and/or hold insurance cover through Select Super
- be eligible to commence a Select Pension Plan (account based pension or transition to retirement account based pension).

If you do not have an existing Select Super account, you will need to open one prior to commencing a pension refresh. Please contact us for more information.

Your current personal information, investment and payment instructions for your existing pension account will be transferred to your new pension account. Your new pension account will not commence until all transactions requested or required as part of the pension refresh process have been completed. In some cases regular business processes may need to be carried out before some steps of the pension refresh process can be completed, which may delay its completion.

To receive a waiver of buy/sell spreads you need to transfer to the same Investment Options in the same amounts as you are currently invested.

Before completing this form, you should:

- read the current Select Super Plan and Select Pension Plan Product Disclosure Statements which include important information on the operation of your super and pension accounts
- consult a financial and/or tax adviser and have them assist you to complete this form
- consider the tax and social security implications associated with your transaction/s.

Please complete this form if you would like to have your existing Select Pension Plan account and Select Super Plan account used to commence a new Select Pension Plan account. The form also provides you with the option to contribute additional funds into your existing Select Super account and also to claim a tax deduction and complete a re-contribution (optional).
