*Additional fees and costs generally apply. Please refer to the Product Disclosure Statement for further details.

Investment objective

To provide income and moderate capital growth through investment in a diversified portfolio of corporate strategies, asset backed strategies and other investments consistent with the fund's investment approach. To outperform the Bloomberg Ausbond Bank Bill Index over rolling three-year periods by 2% per annum.

Investment approach

A multi-manager framework is utilised, where a diverse mix of Australian and international income investments are selected, combining different investment styles and philosophies to provide returns with low correlation to traditional fixed income markets. Derivatives and currency hedging strategies may also be used in managing the portfolio.

Investment strategy

The Income Opportunities Fund is a floating rate non-investment grade multi-strategy credit fund, investing in corporate, asset backed and diversifying strategies. The non-investment grade market is becoming more efficient, and spreads are getting tighter. Having said that, the yield is still attractive. We acknowledge that there are risks to non-investment grade credit. To help mitigate this, we invest with managers that have diversified portfolios and in the worst case, have the ability to lead a workout.

To supplement that yield, the Fund invests in asset backed strategies such as speciality finance. We may have to take a higher risk here to achieve the appropriate return, but we are comforted by the strategy's high velocity of capital.

Growth of \$100,000 since inception (net of fees)³

perpetual.com.au/managed-accounts

1) Fund commenced in March 2008 with performance reporting from 30 June 2008 once the fund had made an investment. The fund was opened to external investors in June 2009. 2) Negative annual returns expected in 3 to less than 4 years over any 20 year period. 3) Total returns have been calculated using exit prices after taking into account Perpetual's ongoing fees and assuming reinvestment of distributions (where applicable). No allowance has been made for contribution fees, withdrawal fees or taxation. 4) Top 10 externally managed exposures. 5) The difference between 'Cash (AUD)' and 'Cash and Cash Alternatives' (as per the Portfolio exposure by asset allocation) represents offshore currencies held for transactional purposes. 6) The leverage ratio is provided as required by ASIC Regulatory Guide 240. Please note that this is look-through leverage of the Fund based on the leverage of the underlying absolute return managers. The Fund itself will not borrow or apply gearing in the ordinary course of business. 7) Market type data is estimation only, provided by the Perpetual Private research team.

^ The fund's benchmark from inception to 31/05/2023 was the Bloomberg Australian Bank Bill Index + 1% pa. Effective from 01/06/2023, the benchmark has been changed to the Bloomberg Australian Bank Bill Index + 2% pa. Historical performance captures the prior benchmark until the effective date of the new benchmark being implemented.
