*Additional fees and costs generally apply. Please refer to the Product Disclosure Statement for further details.

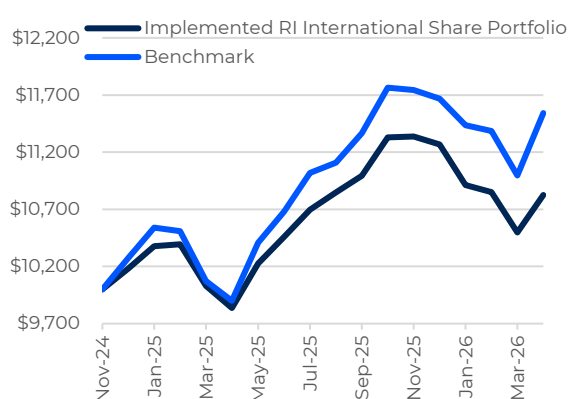

Investment objective

To provide investors with long-term capital growth through investment in a diversified portfolio of international shares[†], aiming to outperform the MSCI All Country World Index – Net Return (unhedged in AUD) (before fees and tax) over rolling three-year periods.

Benefits

Provides investors with access to a diversified portfolio of international shares through a professionally managed, multi-manager investment structure. Manager-specific risk is reduced through the diversification of investment style and philosophy. Responsible Investment considerations are inherent within the specialist investment managers' investment strategies.

Portfolio exposure by manager

As at April 2026

Source(s): State Street, FactSet.

Investment approach

The Portfolio adopts a multi-manager approach, combining specialist investment managers with complementary but different styles and philosophies. This diversification seeks to reduce volatility of the Portfolio by avoiding over-exposure to any single manager or investment style. Specialist investment managers are selected based on their ability to implement Responsible Investment strategies, which may include replication of an ESG index. The currency exposure of international assets is monitored, and hedging strategies may be implemented (using derivatives) with the aim of reducing the impact of adverse currency movements.

Investment strategy

The strategy is biased towards utilising investment managers that have a robust investment process, operate within an appropriate risk management framework and operate in an aligned and stable organisational structure. Utilising a multi-manager framework, the strategy aims to provide a blend of managers that together are expected to deliver a relatively smooth return profile, while including Responsible Investment considerations as part of their investment strategy.

Each investment manager is granted the flexibility to apply their unique investment philosophy and approach to assessing investments from an ESG and responsible investment perspective. This may include the use of both negative and/or positive screening methodologies. However, all specialist investment manager strategies must include the Global Industry Classification Standard (GICS[§]) based exclusionary screens as outlined in the Product Disclosure Statement (PDS), which prohibit investment in companies identified in specific GICS sub-sectors.

From a portfolio construction perspective, the highest weighting within the Portfolio is allocated to a “Core” manager, who is selected to deliver a broadly neutral investment style with the intention of adding ballast to the overall portfolio. With the flexibility to invest broadly across the market capitalisation spectrum of Developed Markets, this style of investment strategy is a benchmark-aware framework, constructing a portfolio that is well diversified and has similar characteristics to the broader market, whilst seeking to deliver attractive risk-adjusted returns via their stock selection process.

Beyond the Core, managers are then selected with certain investment styles and/or biases that are complementary to one another, including the flexibility to invest across Emerging Markets as part of their portfolio construction. In aggregate, the portfolio is expected to be diversified across a large number of holdings and have broad-based exposures from a sector, regional and market capitalisation perspective.

Perpetual undertakes rigorous due diligence prior to manager selection. Each selected manager is engaged under a separate account arrangement, allowing full transparency over the underlying holdings. Managers are subject to ongoing review and may be appointed or removed at Perpetual’s discretion, without prior notice to investors. As such, the composition of specialist investment managers may vary throughout the life of your investment.
