Perpetual Dynamic Fixed Income Fund

About the Fund

The Perpetual Dynamic Fixed Income Fund actively invests in fixed and floating rate securities. We seek to take advantage of credit and interest rate opportunities and believe that this flexibility can help the Fund achieve stable returns.

The Fund has a strategic interest rate risk (duration) exposure. We seek to make tactical adjustments to duration risk to reflect our interest rate views. We believe that tactical shifts to duration tend to be most effective during periods of extreme market movement.

The Fund is actively managed by an experienced team using an investment approach that seeks to identify quality credit investments while actively managing duration.

Fund design

The Perpetual Dynamic Fixed Income Fund is designed for investors who are seeking regular income through investment in a diversified range of income generating assets, have a minimum investment timeframe of three years or longer and are comfortable with the risks associated with the Fund. The Fund has a risk level of Low to Medium*.
