#### MARKET COMMENTARY

Looking back, the second quarter of 2025 will be remembered as a triumph for investor optimism. The sharp initial sell-off following the Trump tariff announcement was swiftly met with an equally sharp recovery. Yet again, value trailed growth, and broad market indexes pushed to all-time highs despite a steady stream of headlines that could have easily derailed the rally. The global outlook remains clouded by uneven growth, fragile geopolitics, and persistent trade uncertainty. This backdrop has created familiar dispersion for investors, with less cyclically exposed or risk-on areas trailing the artificial intelligence (AI)-centric and technology-driven sectors. Once again, a narrow group of companies dominated returns - only three of the eleven GICS sectors outperformed the broader MSCI World Index. Notably, this narrowness was largely U.S.-led; the MSCI ACWI ex-U.S. Index saw twice as many sectors outperform without the same tech-driven skew. While market volatility has become the norm, it continues to present opportunity. Many investors have returned to recent momentum-driven winners, but the breadth of potential disruption - from geopolitical realignment to the unravelling of decades-old trade frameworks - suggests a much more dynamic environment ahead. Market concentration remains a key feature of this cycle, with the Magnificent 7 continuing to dominate global returns. While enthusiasm for AI has driven extraordinary gains - NVIDIA alone surpassing \$4 trillion in market cap - rising capital intensity and unclear monetisation paths raise questions about the durability of these premiums. History suggests these stocks may need time for fundamentals to catch up to valuations.

#### PORTFOLIO COMMENTARY

Given the meaningful reversal away from value stocks in the quarter, the Barrow Hanley Global Value Equity strategy underperformed the MSCI World Index though posted strong results against the MSCI World Value Index. The Fund returned 1.7% over the June quarter, with the MSCI world Index returning 5.9%.

BAE Systems plc positively contributed to relative performance during the quarter, supported by a steady trading update and reaffirmed growth guidance. The UK based defence contractor emphasized strong order momentum across its portfolio, including recent wins in electronic systems and naval platforms. Management noted that most of its U.S. deliveries are produced domestically, insulating the company from potential tariff risks, while the weaker U.S. dollar is expected to have only a low-single-digit impact on financials. BAE also has exposure to the Aukus submarine program, which is under early-stage review by the U.S. government, but the strategic importance of the alliance suggests any disruption is likely to be temporary and may even accelerate Australian defence spending.

Microchip Technology Incorporated positively contributed to relative performance during the quarter as shares rebounded on signs of a cyclical bottom and improving fundamentals. The company, which designs and manufactures microcontrollers and analogue semiconductors, reported March quarter results that exceeded revenue expectations despite a sequential decline, and issued a June quarter outlook that was well ahead of consensus. Management pointed to March as the trough in revenue declines, with bookings improving into April, and guided to sequential growth driven by inventory normalization and stronger demand. The stock remains attractively valued on normalized earnings with a dividend yield of 2.6%.

Halliburton Company detracted from relative performance during the quarter as shares declined on expectations for a slowdown in global capital expenditures in the second half of 2025, driven by weaker oil prices. As the second largest global oilfield services provider, Halliburton is closely tied to upstream investment cycles, and the near-term outlook has softened alongside commodity price volatility. However, OPEC's recent announcement to increase supply has improved the medium-term outlook, as higher activity levels will likely require replacing aging capacity and more services. While the timing of a recovery remains uncertain, Halliburton is well-positioned to benefit from a rebound in global oilfield activity. The stock trades at 8.5x forward earnings and offers a 3.1% dividend yield.

Merck & Co., Inc. detracted from relative performance during the quarter due to a combination of macro and company-specific headwinds. The pharmaceutical company, known for its oncology blockbuster Keytruda and HPV vaccine Gardasil, faced a flat quarter as revenue and earnings were pressured by a sharp decline in Gardasil sales to China, which created a significant top-line drag. Despite the near-term stagnation, Merck's pipeline remains robust, with Winrevair showing strong early momentum and potential to become a multi-billion-dollar asset. While investor sentiment remains muted given the lack of near-term catalysts, Merck trades at 8.5x forward earnings with a dividend yield of 4%.

#### OUTLOOK

Global growth remains uneven, with the U.S. economy treading water amid conflicting signals. Recession fears have ebbed, but growth remains soft, and while tariffs were initially flagged as highly inflationary, their impact has so far been muted. Still, tariff receipts have surged past 2024 levels and are now a key funding source for fiscal initiatives like the One Big Beautiful Bill. In Europe, fiscal easing and rising defence spending are offsetting sluggish growth, while in emerging markets, China and broader Asia are seeing pressure from trade friction. However, a weaker U.S. dollar and falling rates may soften the blow. Market leadership remains narrow and AI-centric, yet dispersion elsewhere is creating opportunities. Regulatory shifts - like U.S. student loan reforms - are reshaping industries and unlocking new growth pockets, including in private credit. These structural changes mirror themes we've seen before: cyclical dislocations, misunderstood inventories, or underappreciated supply constraints. While the first half has been challenging for value, the setup for the remainder of 2025 and beyond is encouraging. Fiscal stimulus, rate cuts, and a shift in market focus could reignite broader participation. As always, our disciplined approach to valuation and fundamentals positions us well to navigate dislocations and deliver long-term value for clients.

Management of this Fund: 09/09/2020 Barrow, Hanley, Mewhinney & Strauss, LLC, from 31/01/2015 to 08/09/2020 Perpetual Investment Management Limited, from 15/8/2011 to 30/01/2015 Wellington Management as sub-adviser, from 18/3/2005 to 14/8/2011 PI Investment Management Limited, from 21/4/1997 to 17/3/2005 Fidelity International Limited as sub-adviser. # The benchmark for the Fund prior to 31/1/2015 was the MSCI World ex Australia Accumulation Index. Returns shown reflect the Fund's benchmark during the period
