

Perpetual WealthFocus Super Plan

Investment Menu

The information in this document forms part of the Perpetual WealthFocus Super Plan Product Disclosure Statement (PDS) issue number 18 dated 10 November 2025 and should be read in conjunction with the current PDS.

You must read this Investment Menu together with the current PDS and the latest product disclosure statement for a managed fund available at each of the links below before investing in the managed fund. When considering the product disclosure statement for a managed fund, you should note that there are differences between investing in a managed fund directly and investing via the Perpetual WealthFocus Super Plan (Super Plan). Refer to the PDS for more information about these differences.

- 1 Except for Perpetual Cash, the full name of the managed fund is provided (including classes where applicable), which may not correspond exactly to the name of the investment option.
- 2 Except for Perpetual Cash, the SRM is applicable to the managed fund. You should refer to the product disclosure statement for a managed fund for more detailed information about risks specific to the managed fund. For Perpetual Cash the SRM applies to the investment option.
- 3 This includes administration fees and costs charged by the Super Plan and estimated investment fees and costs and net transaction costs charged in or through the managed fund and is based on information provided by PIML. For an explanation of this amount, refer to 'Additional explanation of fees and costs' below.
- 4 The investment options' buy spreads are the Super Plan's buy spreads as at 20 August 2026, expressed as a percentage of transactional value. All Super Plan sell spreads are 0.00%. Refer to the PDS for further explanation of these spreads.
- 5 Where the name includes ETF, while accessible via the stock exchange, this managed fund is not acquired through the exchange. Effective on and from 5 June 2026, Magellan Global Fund – Open Class Units – Active ETF was renamed to Vinva Global Alpha Fund – Active ETF to reflect a change in investment manager and investment strategy.
- 6 For MFS Global Equity Trust (the Trust), the SRM is not based on the industry guidance as referred to in the PDS. MFS considers the Trust to be high risk, suitable for investors with the ability to bear 6 or more negative returns over a 20 year period. Under the industry guidance an investment option with an expected 6 or more negative returns over a 20 year period is 7-Very high. Please refer to MFS's Target Market Determination (TMD) for further information about the risk rating.
- 7 For BlackRock Tactical Growth Fund (Fund), the SRM is not based on the industry guidance as referred to in the PDS. BlackRock considers the risk of the Fund on a scale of 1 (very low) to 7 (very high). This risk rating indicates the overall risk profile of the Fund based on the volatility of the returns and operational risk factors such as leverage, derivatives or short selling. The risk band is calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. The risk band shown is not guaranteed and may change over time. The lowest band does not mean risk free.

Additional explanation of fees and costs

The following 'Estimated ongoing annual fees and costs' table provides estimated ongoing annual fees and costs based on the actual fees and costs for the financial year ending 30 June 2025 except for the Perpetual Cash investment option where the administration fee and investment fee applied from 10 November 2025 and the Vinva Global Alpha investment option where the investment costs applied on 5 May 2026 and the investment fee applied on and from 5 June 2026.

As can be seen below, the total annual ongoing fees and costs includes:

- administration fees and costs charged by the SuperPlan
- investment fees and costs charged in or through a managed fund
- transaction costs charged in or through a managed fund net of amounts recovered by the investment option's buy spread.

Estimated ongoing annual fees and costs

Investment option	Administration fees and costs (% pa) ¹	Investment fees and costs		Transaction costs (estimated % pa) ²	Total ongoing annual fees and costs (estimated % pa)

- 1 Figures represent the administration fee for each investment option accessible via the Super Plan. Estimated administration costs for the financial year ended 30 June 2025 are nil for all investment options.
- 2 Estimated transaction costs depend on the managed fund(s) you choose and represent **net** transaction costs borne by all members in an investment option after any buy/sell spread recoveries charged on member transactions, which may vary from year to year. **Transaction costs should not be considered in isolation of investment returns.** It is important to understand that actively managed investments are likely to have higher transaction costs than passively managed investments, such as index funds, because of the higher expected volume of trading of the portfolio's assets in generating investment returns.
- 3 The investment fees shown for each investment option align with the net management fee charged in the managed funds accessible via the Super Plan (ie the gross management fee charged in the unit price of the managed fund less any management fee rebate we may receive from the managed fund and pass on to members). All percentages are rounded up to two decimal places. See 'Management fee rebates' under 'Additional explanation of fees and costs' in the 'Fees and other costs' section of the PDS for further information.
- 4 The investment fee percentage for Perpetual Geared Australian Share investment option is based on the managed fund's management fee of 1.17% pa charged on its gross asset value (GAV), which equates to a management fee of 2.34% pa of the managed fund's net asset value (NAV) assuming an average gearing level of 50% in the managed fund, less the management fee rebate of 0.19% pa received from the managed fund and applied to the investment option. If the average gearing level in the managed fund over the year is lower or higher than 50%, the investment option's investment fee based on the NAV of the managed fund will be respectively lower or higher than 2.15% pa.
- 5 Performance fees maybe applicable for these managed funds. Please refer to each managed fund's product disclosure statement for further details. From 5 May 2026, a performance fee will no longer be charged for the Vinva Global Alpha investment option (previously named the Magellan Global investment option).
- 6 The investment fee percentage for Perpetual SHARE-PLUS Long-Short investment option is based on the managed fund's **management fee of 0.99% pa charged on the sum of its long and short positions (GAV)**, which equates to a **management fee of 1.39% pa** (1.386% pa rounded up to two decimal places) **of the managed fund's net asset value (NAV)** assuming the sum of its long and short positions (maximum 150%) averages 140% over the year, less the management fee rebate of 0.01% pa received from the managed fund and applied to the investment option. If the average sum of the managed fund's long and short positions over the year is lower or higher than 140%, the investment option's investment fee based on the NAV of the managed fund will be respectively lower or higher than 1.38% pa.
- 7 Effective on and from 5 June 2026, the investment fee has been reduced from 0.89% p.a. to 0.74% p.a. The investment costs are estimated to be 0.00% as a performance fee is no longer charged from 5 May 2026. The estimated total ongoing annual fees and costs have been updated accordingly.

Transaction costs

The table below shows the latest estimated transaction costs expressed as a percentage of average net asset value. These estimates are based on the actual costs incurred during the financial year ended 30 June 2025.

Investment option	Total gross transaction costs (estimated % pa) ¹	Transaction costs recovered by buy/sell spreads (estimated % pa) ²	Net transaction costs indirectly borne by all members (estimated % pa) ³

1 This percentage reflects transaction costs incurred in or through any managed fund(s), where applicable.

2 See 'Buy/sell spreads' within 'Additional explanation of fees and costs' in the 'Fees and other costs' section of the PDS.

3 This is the estimated percentage by which the investment option's investment return has been indirectly reduced by transaction costs that have not been recovered by buy/sell spreads. Totals may vary slightly due to rounding.

4 Effective on and from 5 June 2026, the Magellan Global investment option was renamed Vinva Global Alpha to reflect a change in investment manager and investment strategy.

The information is indicative only because:

- this information may be affected by updates by the issuer of the managed fund between the preparation date of this investment menu and the time you invest, and
- the underlying management costs may include estimated performance fees or indirect costs for a previous financial year, and may not reflect the most recent management costs incurred in or through the managed fund.

Environmental, Social, Governance and ethical factors

The Trustee does not specifically take into account labour standards or environmental, social or ethical considerations for the purpose of selecting, retaining or realising managed funds accessible via the Super Plan. The various underlying fund managers for the investment options may have their own policies concerning labour standards or considerations of an environmental, social or ethical nature. To the extent that the underlying fund managers take into account such policies, they do so in their own right.

Investing into the Perpetual Geared Australian Share investment option

If you are a non-advised member (which is a member without a financial adviser listed on the ‘Super Plan application’ form) and you intend to invest in the Perpetual Geared Australian Share investment option, you will be required to undertake a Target Market Assessment in relation to your initial investment, additional investment or switch into this investment option.

Investment limits

The Trustee may impose limits on the amount that can be invested in an investment option.

Trustee investment limits for the Perpetual Geared Australian Share investment option

Due to the higher risk associated with gearing, the Perpetual Geared Australian Share investment option has the following investment limits.

Maximum allocation limit

No more than 50% of your investment portfolio in the Super Plan can be allocated to the Perpetual Geared Australian Share investment option.

Compulsory rebalancing

If you hold an investment in the Perpetual Geared Australian Share investment option, your investment must be rebalanced at regular intervals. We will rebalance your investment portfolio to your investment strategy (see ‘Investment strategy’ and ‘Auto-rebalancing’ in the ‘Operating your account’ section of the PDS for further information) at the frequency shown in the following table.

Rebalancing may result in the purchase or sale of units in the Perpetual Geared Australian Share investment option. The buy spread (see above) will apply to these rebalancing transactions.

Have you nominated auto-rebalancing? ¹	When does rebalancing occur?
Yes ² (including a nominated frequency)	At the frequency you have nominated, on the date ³ of your nominated frequency until the nomination ceases ²
Yes, however no frequency nominated	Quarterly, on 24 February, 24 May, 24 August and 24 November ³
No (auto-rebalancing will be applied to your account if you are invested in the Perpetual Geared Australian Share investment option)	Yearly, on 24 August ³

- 1 See ‘Auto-rebalancing’ in the ‘Operating your account’ section in the PDS for information about how to nominate auto-rebalancing.
- 2 In the event that auto-rebalancing subsequently ceases, compulsory rebalancing will then occur yearly if you are invested in the Perpetual Geared Australian Share investment option (as shown in the last row of the above table) unless or until you recommence auto-rebalancing.
- 3 Or the next business day is this date is not a business day.
