

Perpetual WealthFocus Investment Advantage

Updated estimated ongoing annual fees and costs reflecting the financial year ended 30 June 2025

This document should be read in conjunction with the current Product Disclosure Statement issue number 12 dated 12 May 2025 (PDS) for Perpetual WealthFocus Investment Advantage, including the Features Book dated 21 May 2025 which contains additional information about fees and costs.

Ongoing annual fees and costs

The total ongoing annual fees and costs for each investment option comprises:

- management fees and costs
- any applicable performance fees
- transaction costs.

The estimated ongoing annual fees and costs shown in the current PDS include our management fees, estimated management costs, estimated performance fees and estimated transaction costs (based on the financial year ended 30 June 2024). The following table provides updated estimated ongoing annual fees and costs for the financial year ended 30 June 2025. Except as otherwise stated, estimated costs are calculated based on our reasonable estimates of management costs and transaction costs using the actual costs incurred for the first 11 months in that financial year and annualising these actual costs for the 12 month period.

Ongoing annual fees and costs may vary in future years.

Updated estimated ongoing annual fees and costs reflecting the financial year ended 30 June 2025

- 1 We have set the investment management fee for each investment option to align with the net management fee charged in the underlying fund (ie the gross management fee charged in the unit price of the underlying fund less any management fee rebate we may receive from the underlying fund and pass on to investors). All percentages are rounded up to two decimal places.
- 2 Estimated other management costs are based on the financial year ended 30 June 2025, which may vary in future years without notice.
- 3 Estimated performance fees are generally based on average annual performance fees charged in the relevant underlying funds for the previous five financial years ended 30 June 2025. **Performance fees should not be considered in isolation of investment returns. Past performance and these estimates are not indicative of future returns.** Performance fees payable in the future may vary depending on the underlying funds' actual investment returns. For **Schroder Fixed Income** investment option, **Perpetual SHARE-PLUS Long-Short** investment option, **Magellan Global** investment option, the performance fee charged in the respective underlying funds for the financial year ended 30 June 2025 was 0.00%.
- 4 Estimated transaction costs represent **net** transaction costs borne by all investors in an investment option after any buy/sell spread recoveries charged on investor transactions for the financial year ended 30 June 2025, which may vary in future years without notice. **Transaction costs should not be considered in isolation of investment returns.** It is important to understand that actively managed investments are likely to have higher transaction costs than passively managed investments, such as index funds, because of the higher expected volume of trading of the portfolio's assets in generating investment returns.
- 5 The investment management fee percentage for Perpetual Geared Australian Share investment option is based on the underlying fund's **management fee of 1.17% pa charged on its gross asset value (GAV)**, which equates to a **management fee of 2.34% pa of the underlying fund's net asset value (NAV)** assuming an average gearing level of 50% in the underlying fund, less the management fee rebate of 0.19% pa received from the underlying fund and applied to the investment option. If the average gearing level in the underlying fund over the year is lower or higher than 50%, the investment option's investment management fee based on the NAV of the underlying fund will be respectively lower or higher than 2.15% pa.
- 6 The investment management fee percentage for Perpetual SHARE-PLUS Long-Short investment option is based on the underlying fund's **management fee of 0.99% pa charged on the sum of its long and short positions (GAV)**, which equates to a **management fee of 1.39% pa** (1.386% pa rounded up to two decimal places) **of the underlying fund's net asset value (NAV)** assuming the sum of its long and short positions (maximum 150%) averages 140% over the year, less the management fee rebate of 0.01% pa received from the underlying fund and applied to the investment option. If the average sum of the underlying fund's long and short positions over the year is lower or higher than 140%, the investment option's investment management fee based on the NAV of the underlying fund will be respectively lower or higher than 1.38% pa.
