Investment objective

To provide long-term capital growth through investment in a diversified portfolio of corporate strategies, asset backed strategies and other investments consistent with the fund's investment approach. To outperform the Bloomberg Ausbond Bank Bill Index over rolling three-year periods by 2% per annum.

Strategy

Build a diversified portfolio that includes specialist credit and absolute return investments. Subject our investment opportunities to detailed research, screening them for expected return, risk, downside protection properties and portfolio fit. Select the highest ranked investment managers that have passed our Quality Filters.

Market opportunity

Both Australian and global banks are currently under pressure to reduce their loan books. This is driving the opportunity for the Perpetual Income Opportunities Fund to invest in strategies that conduct institutional grade direct lending to high quality companies and real estate assets that require capital.

A common trait of the lending opportunity is that lending is senior in the capital structure and secured against assets. We have identified and built material investments in three key credit sectors, specifically infrastructure debt, senior bank loans and commercial mortgages.
