

Perpetual Private

PERPETUAL SELECT DIVERSIFIED FUND

September 2025

FUND FACTS

Investment objective: Long-term capital growth and income through investment in a diversified portfolio.

Suggested length of investment: Five years or longer

BENEFITS

Provides investors with access to a diverse range of growth and income producing assets.

RISKS

All investments carry risk and different strategies may carry different levels of risk. The relevant product disclosure statement or offer document for a fund should be considered before deciding whether to acquire or hold units in that fund. Your financial adviser can assist you in determining whether a fund is suited to your financial needs.

INVESTMENT APPROACH

Invests into a diverse mix of assets (see 'Investment guidelines' below). Tactical asset allocation strategies may be applied. This process involves the Fund adjusting its exposure to asset classes on a regular basis within the investment guidelines. Derivatives and exchange traded funds may be used in managing each asset class.

Growth Alternatives	10	0 - 20

PORTFOLIO COMMENTARY

The Perpetual Select Diversified Fund finished higher for the September quarter but underperformed its composite benchmark over the same time period. Global Fixed Income and the Defensive Alternatives were the sole contributor to added value. While the majority of other asset classes within the fund finished in positive territory, none managed to beat their respective benchmarks, contributing to the fund’s relative underperformance.

For the quarter, Australian Equities (S&P/ASX 300 Accumulation Index) gained 5.0%, Global Equities (MSCI All Country World Index) increased 6.4% and listed Real Estate (Composite Listed Index) rose 3.9%. Australian Fixed Income (Composite Index) delivered 0.4% and Global Fixed Income (Composite Index) returned 1.0%. All returns are in AUD.

The Perpetual Select Australian Share Fund underperformed the S&P/ASX 300 benchmark for the September quarter. Our Growth manager, Selector, had a particularly difficult quarter and was the primary detractor for the period. They faced stylistic headwinds, with Growth stocks underperforming Value stocks by 13% over the quarter. An underweight exposure to Resources stocks, which were the standout performers, and an overweight to Healthcare, the worst performing sector, contributed to the underperformance. Our Value manager, Perpetual, also had a more challenging quarter, despite the broader strength in value stocks. Key detractors were concentrated in the Financials, Materials, Industrials and Communication Services sectors. The UBS ASX20 passive strategy also delivered a return that was 2% lower than the fund’s ASX300 benchmark, with notable underperformance from CBA, CSL, QBE Insurance, Woolworths and WiseTech. In contrast, our small cap managers, DNR and Tribeca, were standout contributors. Both benefited from favourable sector positioning and strong stock selection, with Tribeca up 11.9% and DNR delivering an impressive 18.5% for the quarter. During the period, we terminated our mandate with core manager Cooper Investors in early August. The balance was transitioned to Citibank and fully equitized via S&P/ASX200 (SPI) Futures, where it remains temporarily until a replacement manager is appointed. Cooper Investors marginally underperformed during the short period prior to termination.

The Perpetual Select International Share Fund underperformed the MSCI All Country World Index (unhedged AUD) on a net-of-fees basis in the September quarter. Of the manager line, Arrowstreet, Man Numeric, and Lazard outperformed the benchmark over the period. Lazard was added to the portfolio part way through the quarter, replacing Cooper Investors. Barrow Hanley underperformed the benchmark, while SGA materially underperformed the benchmark during the quarter. At the aggregate portfolio level, stock selection effect was the largest detractor, followed by cash (in what was a strong quarter), and underweight exposures to Emerging Markets and an overweight exposure to Europe. Stock selection was primarily the weakest within the Information Technology, Consumer Discretionary, and Financials sectors.

The Select Real Estate Fund underperformed its composite benchmark over the quarter. Resolution Capital, the portfolio’s sole exposure to Global REITs underperformed its benchmark over the quarter, net of fees. Healthcare, Ventas and Welltower and retail, Unibail-Rodamco and Scentre, were the major contributors. Office, including Derwent London, and self-storage which under performed as a sector, were the largest detractors. Renaissance Asset Management, the portfolio’s sole exposure to Australian REITs, outperformed its benchmark over the quarter, net of fees. An underweight to Goodman Group was the largest contributor while retail exposures, Carindale and Unibail-Rodamco also added value. Fund managers, data centres and specialised REITs all detracted but there were no significant individual stock moves.

The Perpetual Private Global Fixed Income Fund outperformed the Bloomberg Global Aggregate Bond Index (hedged AUD) over the quarter by 0.1%. Positive performance contribution was primarily driven by manager alpha across Colchester and Western Asset. Over the quarter, the Western’s largest contributor was positive credit selection while maintaining a generally neutral duration position. Colchester benefitted from overweight positions in New Zealand, Mexico, Indonesia and Norway were all strong contributors to performance. Specific to Alliance Bernstein, country duration positioning was the primary detractor of performance.

The Perpetual Private Australian Fixed Income Fund returned 0.34% during the quarter, slightly underperforming the Bloomberg AusBond Composite 0+ Year Index. The Macquarie True Index Australian Fixed Interest is a passive strategy and has matched the benchmark performance over the quarter, less fees.

Perpetual’s Defensive Alternatives Pool Fund returned 1.6% for the three months ending September 2025, outperforming the Bank Bill +2% benchmark return of 1.5%. Returns from the Fund’s allocations to broadly syndicated loans, trade finance and floating rate credit were positive, contributing to this quarter’s performance.

Perpetual’s Growth Alternatives Pool Fund marginally underperformed its Bank Bill +3% benchmark in Q3 2025, delivering investors a positive return of +1.4% over the period. In local currency terms, underlying asset performance was positive across most sub sectors, with the exception of Opportunistic Property which was marginally negative for the period. Other Growth Alternatives was the best performing sub sector within the fund, with stronger returns coming through from our higher cash-yield investments across Aviation Leasing and GP Stakes. While Infrastructure, Private Equity and Absolute Return (hedge fund) exposures also contributed positively to the fund’s performance.

OUTLOOK

The September quarter presented investors with a complex mix of geopolitical tension, elevated valuations, and persistent inflation risks. Despite this, markets continued to climb, buoyed by resilient sentiment and enthusiasm around AI-led growth.

As we enter the final quarter of 2025, the macro backdrop remains broadly supportive. Central banks have begun easing, AI continues to drive optimism, and tariffs have yet to materially disrupt global growth. However, risks remain. The ongoing US government shutdown has begun to impact the availability of economic data, leaving central banks with limited visibility as they assess policy settings. Labour market indicators are softening, inflation remains above target, and trade policy uncertainty could fuel further volatility.

Valuations, particularly in tech, remain elevated and reflect high expectations. While not inherently problematic, they do leave markets vulnerable to any disappointment in AI adoption or investment.

In this environment, a disciplined and methodical approach remains essential. While a correction is possible, staying invested and managing downside risks thoughtfully will be key to navigating the months ahead.
