

# Meet Perpetual's Credit and Fixed Income team

By Perpetual Asset Management

13 May 2026

Australia's credit market offers compelling advantages, with many industries characterised by a few dominant players with concentrated market share. This concentration has supported strong earnings, robust balance sheets and resilience across economic cycles.

Continued market expansion — driven by increased bond issuance from both domestic and global issuers, growing offshore investor participation and the evolution of private credit — has seen opportunities broaden for investors.

Perpetual's Credit & Fixed Income team brings a collaborative, experience-driven perspective to portfolio construction and decision-making, with over two decades of experience navigating global markets.

Their investment process is grounded in fundamental credit research, robust risk management and a relentless focus on downside protection.

Investors benefit from the teams' active management style, deep sector specialisation and disciplined, risk-first approach, honed through major market events like the GFC and pandemic.
