### MARKET COMMENTARY

On aggregate, credit spreads tightened slightly in December. Downward pressure on spreads came from increased secondary demand as new issuance slowed towards the year end as expected. Major bank spreads led the way, seeing contraction through December. Westpac spreads tightened but lagged their major peers, reflecting concerns surrounding the ongoing AUSTRAC investigation. In addition, the prudential regulator (APRA) announced in December that Westpac capital requirements would increase by \$500M and an extensive risk governance review would take place.

The RBA held the official cash rate at 0.75% maintaining their easing bias. Consensus suggests two further cuts for 2020 beginning in February which would complete the last of the traditional monetary ammunition. The RBA has stated that 0.25% represents the policy rate lower bound and that a program of quantitative easing may follow if required.

Issuance of corporate credit is projected to return to long term levels following the holiday season, providing additional potential investment opportunities.

### TRUST COMMENTARY

The portfolio continued to collect running income across all corporate and collateralised sectors. This positive contribution was broadly based, coming from corporates, domestic banks, residential mortgage backed securities and non-bank financials.

Credit spread dynamics were positive for performance. Credit spread tightening contributed to performance particularly in the non-financial corporate, domestic bank and property sectors.

Examples of trades during December include the Manager taking part in the \$72M deal from IMF Bentham and increasing allocation to NAB's 12-year non-call 7 November floating rate note. Profits were taken during the month, reducing domestic bank exposures while cash allocation was increased ahead of upcoming opportunities identified for January.

The Portfolio Manager will continue the process of investing in good quality corporate issues with an attractive running yield. An increase in issuance is expected for the new year, including the return of domestically issued senior unsecured bank debt which has been notably light in the last quarter of 2019.

### **INVESTMENT STRATEGY**

The Trust will hold a diversified and actively managed portfolio of domestic and global credit and fixed income assets. Typical investments will include corporate bonds, floating rate notes, securitised assets and private debt (for example, corporate loans). Exposure to corporate loans may be gained indirectly through the Perpetual Loan Fund. The Trust will typically be invested in 50 to 100 assets. Derivatives may be used as part of the Trust's Investment Strategy.\*

### **TARGET RETURN**

The Trust has a target total return of RBA Cash Rate plus 3.25% p.a. (net of fees) through the economic cycle. This is a target only and may not be achieved.

### **ABOUT THE MANAGER**

The Trust is managed by Perpetual Investment Management Limited. The Manager has one of the most experienced, proven and stable credit and fixed income teams in the Australian fixed income market. The Manager and the Responsible Entity are wholly owned subsidiaries of Perpetual Limited.

### **PORTFOLIO MANAGERS**

### Michael Korber

Michael has over 37 years' experience, having been involved in credit markets since their development in Australia during the 1990's. Unlike many other fixed income portfolio managers in this market, Michael has a background in lending and banking, understanding credit risk in a fundamental way.

### **Anne Moal**

Anne is an experienced credit markets specialist, having worked for 22 years in credit and fixed income markets in research, origination and trading roles. Anne joined the Credit and Fixed Income Team at Perpetual Investments in 2014. Anne is the portfolio manager of the Perpetual Loan Fund with a focus on higher yielding income opportunities.
