ABOUT THE FUND

Perpetual's Diversified Real Return Fund provides investors with access to a broadly diversified portfolio that weights asset classes according to their overall risk contribution to the total portfolio rather than capital allocations.

By diversifying the sources of risk and forming a more efficient multi-asset portfolio we are seeking to reduce the uncertainty of investment outcomes over the investment horizon and protect returns against inflation.

The Multi Asset team has the flexibility to actively shift the investment exposures to capture the best opportunities – wherever they are found. Importantly, they do not have to hold any investments or asset classes where they believe the level of return is insufficient to compensate investors for the amount of risk.

HOW DOES THE FUND FIT INTO A WELL-BALANCED PORTFOLIO?

The Diversified Real Return Fund invests across a range of geographies, sectors, strategies and sources of returns that can be difficult for investors to access directly.

Because it is focused on reducing uncertain investment outcomes, the Fund can suit those seeking a smoother, more regular profile of returns, providing protection against inflation and volatility without having to sacrifice growth.

With a greater diversity of investment opportunities, the Fund is designed for investors with a little or a lot to invest.
