## Annual Outcome Assessment

The Annual Outcome Assessment considers a range of comparisons and assessments which Perpetual Superannuation Limited, as Trustee of Perpetual's Select Superannuation Fund (Fund), uses to determine whether we have promoted the financial interests of our members. Broadly this includes comparisons and assessments of the level of investment risk and returns, fees and costs and other factors such as services provided to members. In this assessment we provide a summary of the outcomes for members in the Perpetual Select Pension Plan (the Plan).

A key factor in determining whether we have promoted members' financial interests is how we deliver investment return (net of fees) and manage investment risk. Our investment approach is targeted at delivering strong, consistent risk-adjusted returns. We consider this approach appropriate to the needs of our members, with more than 80% of the members of the Plan aged 70 years or older. This influences their risk tolerance and capacity to recover from market downturns.

During the 2021 financial year we have taken many steps to improve the outcomes for members such as launching our new member online portal, myPerpetual, and lowering fees. Further fee reductions are being made effective 1 March 2022, showing our commitment to remain competitive in a market where fees are steadily declining.

## Determination for the year ending 30 June 2021

We have determined that we have promoted the financial interests of members of the Perpetual Select Pension Plan.

### **Investment strategy**

*The investment strategy for the Plan, including the level of investment risk and the return target, is appropriate for members.*

We generally follow a multi-manager approach to investing, where Perpetual selects a range of specialist investment managers to manage the assets of the Plan. Perpetual chooses specialist investment managers to combine their different styles, philosophies, approaches and techniques, with the aim of enhancing diversification within each asset class and producing more consistent returns.

For the period ending 30 June 2021, the Select Pension options have generally delivered lower returns, at a lower level of risk, than peers (see table on page 5). Our investment approach is aimed at delivering strong, consistent risk-adjusted returns. This approach is considered appropriate for the Plan's membership.

### **Fees and costs**

*The basis for the setting of fees is appropriate and the Plan's operating costs are not inappropriately affecting members' financial interests.*

The fee comparison shows that total fees are above peer medians. The investment approach adopted by the Plan, outlined above under Investment strategy, is typically higher cost. The investment approach is considered appropriate for the membership of the Plan, with more than 80% of the members of the Plan aged 70 years or older. This influences their risk tolerance and capacity to recover from market downturns.

Fees were lowered in October 2020 to improve outcomes for members. Further fee reductions are being made effective 1 March 2022, showing our commitment to remain competitive in a market where fees are steadily declining.

### **Options, benefits and facilities**

*The options, benefits and facilities offered under the Plan are appropriate for members.*

Based on feedback from members, they value the services that we provide such as our locally based contact centre and online member portal. Further, during the 2022 financial year we introduced a Member Engagement Strategy outlining the metrics that we monitor of our progress in deepening member engagement.

Supporting members' best financial interests means it is important to be selective in the services provided. In our case, this means choosing not to provide financial product advice to members. Our view is that members are able to engage external financial advisers according to their needs and objectives. This means that the cost of providing advice is not incurred by all members in the Plan, including those who do not wish to use such a service.

### **Overall size and scale of operations**

*Members of the Plan are not disadvantaged due to scale.*

Members of the Plan benefit by the Plan being part of the Perpetual Group, a global diversified financial services business managing close to \$100bn in assets (as at 30 June 2021). The Plan is able to leverage the investment and administration capabilities of the broader Perpetual Group. This means that delivering the outcomes that we seek for our members is sustainable into the future as members of the Plan benefit from the scale and growth of the Perpetual Group.

## Investment strategy and level of investment risk and returns

The investment strategy for the Plan is to offer a range of investment options (which have different levels of risk and generate investment returns in different ways, over different time frames and from different asset classes) enabling members to select the investment option(s) that meet their needs and circumstances.

The Plan generally adopts a multi-manager approach to investing, where Perpetual chooses several specialist investment managers for most of the various asset classes to manage the underlying assets of the investment options. This multi-manager approach reduces the risk associated with using a single specialist investment manager, as an individual manager's performance can change over time or with different market conditions.

Perpetual chooses specialist investment managers to combine their different styles, philosophies, approaches and techniques, with the aim of enhancing diversification within each asset class and producing more consistent returns.

The Plan offers a range of 5 multi-asset class investment options with differing risk profiles ranging from conservative to high growth. Most members choose to invest via these pre-mixed options. The Plan also offers 6 single asset class options that members can use to tailor their exposure to a particular asset class.

The Returns and Risk Comparisons on the following page shows that for the period ending 30 June 2021, the Plan's options have generally delivered lower returns, at a lower level of risk, than the median of the peer group. Risk (standard deviation) is a measure of the volatility of the returns. A lower number indicates more consistent returns (ie lower risk). A higher number indicates more variability in returns (ie higher risk).

Our investment approach is aimed at delivering strong, consistent risk-adjusted returns. This approach is considered appropriate for the Plan's membership, with more than 80% of members aged 70 years or older. This influences their risk tolerance and capacity to recover from market downturns.

## Select Pension Plan –Returns and Risk Comparisons

Red – below median net returns, above median risk (standard deviation)

## Fees and costs and basis for setting fees

The Plan levies administration fees for the administration of member accounts and to meet the ongoing costs of operating the Plan and its investment options. Administration fees are set at a flat rate of \$84 p.a. and a variable rate of 0.20%p.a. (for most options). The flat fee goes to covering operational and administrative costs that do not vary by account balance, such as the cost of preparing and mailing account statements. The variable component goes to covering other operational and administrative costs, such as fund accounting fees from service providers.

Investment fees are for overseeing the Plan's investments. The amounts differ between investment options due to the nature of each investment option's underlying investments.

The Fee Comparison on the following page shows that total and investment fees are above peer medians, while the administration fee is below the peer median.

The investment approach adopted by the Plan is typically higher cost compared to some peers. As outlined in the investment strategy section we seek to deliver strong, consistent risk-adjusted net returns. These objectives are implemented by an investment approach that uses multiple investment managers, and an active approach to investment management. This approach is considered appropriate for the membership of the Plan, considering that more than 80% of members are aged 70 years or older and generally do not have a financial adviser.

To ensure our approach to setting fees remains appropriate, further fee reductions are being made, effective 1 March 2022, showing our commitment to remain competitive in a market where fees are steadily declining.

## Select Pension Plan –Fee Comparison

### Total Fees

Total Fees	\$50k	\$100k	\$500k

## Options, benefits and facilities

Members benefit from a range of services aimed at assisting them in managing their retirement savings including:

- a local contact centre that members have consistently rated highly in terms of professionalism, availability and responding quickly to questions,
- online account access – allowing members to view account balances, complete transactions, view insurance details and statements. Member surveys have shown increasing satisfaction with our online services since the launch of our new online member portal, myPerpetual, in December 2020, and
- a website providing insightful articles on investments and managing wealth.

Further, during the 2022 financial year we introduced a Member Engagement Strategy outlining the metrics that we monitor of our progress in deepening member engagement.

A key differentiator from other super funds is that we do not offer financial product advice services. We believe in the value of financial advice and consider that this is best provided by the member engaging their own financial adviser separate from the Plan. Not providing financial advice assists in keeping our administrative fees competitive.

## Overall size and scale of operations

Members of the Plan benefit as a result of the Plan being part of the Perpetual Group, a global diversified financial services business managing close to \$100bn in assets (as at 30 June 2021). The Plan leverages the investment and administration capabilities of the broader Perpetual Group. This means that delivering the outcomes that we seek for our members is sustainable into the future as members of the Plan benefit from the scale and growth of the Perpetual Group.

Given the scale and growth of the Perpetual Group, we are comfortable that members of the Plan receive scale benefits irrespective of the size of the Plan. This is supported by market benchmarking that shows operational expenses per member are below market medians. This is reflected in the competitiveness of the administration fees shown in the fee comparison table on page 7.

## **Attachment 1 – Peer groups and definitions**

### Definitions:

We – Perpetual Superannuation Limited, the trustee of Perpetual’s Select Superannuation Fund

Perpetual – Perpetual Investment Management Limited

The Plan – Perpetual Select Pension Plan, part of Perpetual’s Select Superannuation Fund

### Peer groups:

#### **Returns and risk comparison**

Data for the comparisons was sourced from SuperRatings’ Fund Crediting Rate Survey. The criteria applied to the selection of peer groups was:

- assign each of the Select Investment Options to one of SuperRatings asset class categories
- construct peer group from all options in the SuperRatings selected SR50 or SR25 grouping for that asset class category for the relevant product type (pension)

#### **Fee comparison**

Data for total fees and administration fees was sourced from SuperRatings’ Fee survey. The criteria applied to the selection of peer group was to:

- include Funds in the Master Trust – Allocated Pension category (this is the category that the Plan belongs to)
- exclude multiples of the same or similar investment options from the same provider (to avoid selection bias, the highest fee version of the multiple was excluded)
- exclude passively managed options

Data for investment fees was sourced from SuperRatings’ Investments survey. The criteria applied to the selection of peer group was to:

- include investment options in the Master Trust – Allocated Pension category (this is the category that the Plan belongs to)
- group investment options by SuperRatings designated asset classes
- remove passively managed options
- assign each of the Select investment options to a Super Ratings defined asset class

This selection was chosen as providing similar choice options to Select in terms of investment approach, services, features and functionality available to members and their advisers.
