Since 2005, **Black Creek has managed global equities** in a disciplined and consistent manner. We are a focused, boutique investment manager and are 100% employee-owned. We invest personally in the strategies we manage, ensuring our interests are aligned with those of our clients.

Black Creek's investment-driven approach concentrates on building high conviction portfolios of winning businesses from around the world that are misunderstood or misperceived by the market. Our business-owner mindset and long-term perspective allow us to think differently. The net result for investors is not only a long-term, high-conviction strategy, but it means our portfolios are eclectic, bearing little resemblance to any global index. Any sector or geographical allocations within our portfolio are a by-product of our unconstrained, go anywhere global style. While our portfolios are concentrated, there is a conscious diversification of investment ideas.

We focus on understanding the long-term drivers of a winning business, not quarter to quarter earnings. Our investment process requires independent and sometimes contrarian thinking. We consider what a business will look like over the next 5 to 10 years, and short-term market volatility provides the opportunity to create significant value for our clients over time. This approach requires a constitution of character amongst our investment professionals to withstand the inevitable shorter periods of time when you look completely different from other investors in order to add long-term value.

The firm is part owned by employees who are active in the firm. The investment team includes nine primary research analysts, each a generalist with unique perspective resulting from real world experience responsible for the fundamental research that is the hallmark of our investment approach. Since inception, SGA has utilized a common investment philosophy across all client portfolios. SGA focuses on those few differentiated high-quality global businesses that offer strong, predictable, sustainable earnings and cash flow growth over the long term. There are typically 100+ global companies that meet the fundamental characteristics that we require of all portfolio holdings (pricing power, recurring revenues, global opportunity, management strength, and financial strength) and that have successfully passed our rigorous fundamental research process to be included on what we call the Qualified Company List. From that list we then build portfolios of 25-35 companies, choosing those where we have the highest conviction in the underlying business fundamentals and that offer the most attractive opportunities based on our cash flow based valuation discipline.
